Ring sizer

to be printed at actual size

make sure you are 100% positioned with your printer's print settings

Important

In order to check that your ring sizer has been printed in real size, please check that the scale below is well at 5cm

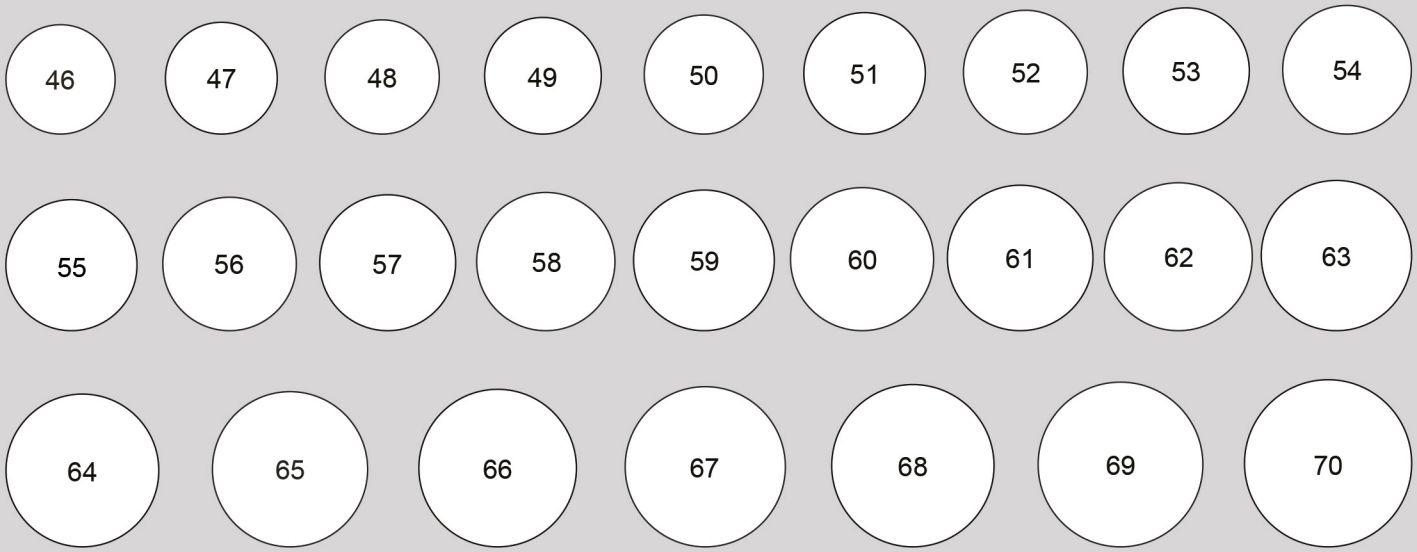

How to measure your finger size?

Step 1

Have a ring (a wedding ring for example) that you can put on your finger on which you will wear your new ring (the finger size often varies from one hand to another)

Step 2

Lay the ring on the circles below. Your finger size corresponds to the circle whose black trai appears completely inside the ring, without you can see a gray background. Take the number of the circle and indicate it in your product order.
